

GFL AI DEAL ANALYSER

9 Hibiscus Way

Seville, St. Ann's Bay, St. Ann, Jamaica

ASKING PRICE: NOT PROVIDED

MLS# 100907 | 6 Bed / 6 Bath | 4,245 sq ft | 0.30 acres

VERDICT: AMBER

Proceed to Due Diligence — Negotiate on Price

Strong multi-family income asset | Development upside | Asking price must be confirmed before full Green

Property Type	Split-level house, converted to 4 apartments (2x2-bed, 2x1-bed)
MLS#	100907 DOM: 48
Location	Seville Subdivision, St. Ann's Bay, St. Ann — North Coast Highway
Floor Size	4,245 sq ft total
Lot Size	12,887 sq ft (0.2958 acres)
Asking Price	NOT PROVIDED — request immediately from agent
Best Strategy	Multi-family BTL with partial STR conversion + development option
Estimated Gross Rent	JMD \$2,808,000 – \$3,120,000 p.a. (~USD \$18,100 – \$20,130)
Indicative Max Price	USD \$280,000 – \$320,000 (for 6% gross yield target)
Year Built	Not stated — independent structural survey essential
Analysis Date	9 June 2026
Reference	JAM-STA-0609-002

This report is for investment evaluation only. It does not constitute legal, tax, mortgage, planning, or surveying advice. Instruct a qualified Jamaican attorney, chartered surveyor, and accountant before proceeding. All financial projections are estimates and must be independently verified.

1. EXECUTIVE SUMMARY

9 Hibiscus Way, Seville is a 4,245 sq ft split-level house in an established St. Ann subdivision, already converted and operating as four separate residential apartments (two 2-bed/2-bath and two 1-bed/1-bath units). At 48 days on market the property has not yet found a buyer, which provides negotiating room. The deal presents as a viable income-producing multi-family asset with meaningful upside via STR conversion of upper-level units (ocean views, proximity to Ocho Rios) and development potential on the remaining lot area. The primary obstacle to a Green verdict is the **absent asking price** and an **unknown year of build** — both are critical inputs that must be confirmed before a definitive financial view can be formed. Subject to price, title, and survey, this is a sound income asset in a well-connected north coast location.

2. PROPERTY OVERVIEW

Address	9 Hibiscus Way, Seville, St. Ann's Bay, St. Ann, Jamaica
MLS#	100907
Status	Active DOM: 48
Asking Price	NOT PROVIDED — confirm with agent immediately
Style	Split-level house
Subdivision	Seville
Bedrooms / Baths	6 bed / 6 bath (across 4 apartments)
Unit Mix	2× 2-bed/2-bath + 2× 1-bed/1-bath
Additional Spaces	Laundry room, helper's quarters, storeroom, utility space, large garage
Floor Area	4,245 sq ft total
Lot Size	12,887 sq ft (0.2958 acres)
Year Built	NOT STATED — structural survey essential
Condition	Modified/converted — condition to be verified by survey
Furnishing	Unfurnished — furnishing budget required for rental-ready units
Views	Ocean views from upper level
Road Access	Paved road North coast highway community
Proximity	5 min to St. Ann's Bay town 20 min to Ocho Rios 10 min walk to sea
Amenities noted	Additional accommodation, garden area, water heater
Sale Type	For Sale

CRITICAL FLAG: No asking price in listing. Request from agent before any further steps.

3. AREA AND DEMAND SUMMARY

St. Ann's Bay, St. Ann is the capital of St. Ann Parish on Jamaica's north coast. It sits between Ocho Rios (20 min east, Jamaica's second-largest tourism hub) and Runaway Bay (15 min west). The town is a mixed-use urban centre with residential, commercial, health, and educational demand. Seville is an established residential subdivision offering paved road access and a quiet, family- and seniors-oriented environment with ocean proximity.

Residential rental demand	Steady demand from local professionals, public sector workers, healthcare staff (St. Ann's Bay Hospital nearby), and teachers.
---------------------------	--

Tourism spillover	Ocho Rios proximity (20 min) generates STR demand for guests seeking quieter stays away from the town centre.
Ocean views / location	Upper-level sea views add STR appeal; 10-min walk to the sea is a marketable feature on Airbnb.
Infrastructure	Paved road access, north coast highway connectivity — strong commuter and access position.
Seniors market	Listing notes 'seniors oriented' — supports a boutique senior living / assisted living strategy.
Ocho Rios economy	Proximity to Ocho Rios port and tourism economy underpins stable employment and rental demand.

Demand Risks

- St. Ann's Bay is a secondary rental market — residential rents are lower than Kingston or Montego Bay, limiting USD yield.
- STR demand is heavily dependent on Ocho Rios tourism proximity — direct Negril or Montego Bay beach access it is not.
- JMD-denominated rental income creates currency risk for a USD or GBP-based investor.
- Unknown year of build — older stock may carry hidden structural or utility costs.
- Multi-unit conversion compliance unknown — apartment use may not have formal planning/building permit approval.

4. STRATEGY STACK ANALYSIS

Strategy	Viability	Notes
Multi-family BTL	HIGH	Property already configured as 4 apartments — immediate income with minimal setup. Primary strategy.
Partial STR Conversion	HIGH	Convert 1–2 upper-level units to STR (ocean views). STR yield vs LTL can be 3–5× better per unit in JMD.
BRRRR	MEDIUM	Buy, refurbish to higher spec, refinance locally (high JMD rates ~10–12%) or remortgage UK asset. Viable with patience.
Development — Add Units	MEDIUM	0.30 acre lot has remaining buildable space (currently ~33% coverage). Could add 1–2 studio / 1-bed units with planning consent.
Senior / Assisted Living	MEDIUM	Listing flags 'seniors oriented' location. Could operate as boutique senior accommodation — growing Jamaica market. Requires licensing.
Flip / Resale	MEDIUM-LOW	St. Ann's Bay resale market is thin. Only viable after 3–5 year hold and capital improvement.
Operator Lease	LOW-MEDIUM	Lease entire building to a housing operator or property manager — reduces yield but removes management burden.
Single-Family Reconversion	LOW	Converting back to single family would destroy income streams and value — not recommended.
Villa / Tourism STR (full)	LOW	Full STR operation requires reconversion; location is not a primary villa rental market.

Recommended strategy: Multi-family BTL as base, convert 1–2 upper-level units to STR to maximise USD yield, with a medium-term development option on remaining lot.

5. FINANCIAL ANALYSIS

ASKING PRICE NOT PROVIDED. Financial analysis uses yield-based price sensitivity. All JMD figures converted at 155 JMD/USD. Re-run fully once asking price confirmed.

A. Acquisition Cost Estimates (USD)

Note: Transfer Tax (2% of sale price) is paid by the seller in Jamaica. Buyer bears stamp duty, registration, attorney fees, and survey costs.

Purchase price	TBC — see sensitivity table below
Jamaican attorney fees (~2.5%)	~2.5% of purchase price
Stamp duty / registration (~1.5%)	~1.5% of purchase price
Surveyor's ID report	USD \$750
NLA title search	USD \$300
Structural survey	USD \$1,000 – \$1,500
Furnishing / fit-out (4 units)	USD \$15,000 – \$25,000 (unfurnished — STR units need more)
TOTAL ACQUISITION COSTS (ex price)	~4% of purchase price + USD \$17,550–\$27,550

B. Rental Income Projection (Long-Term Let — JMD)

Unit	Conservative	Base Case	Optimistic
2× 2-bed/2-bath (each)	JMD \$70,000/mo	JMD \$85,000/mo	JMD \$100,000/mo
2× 1-bed/1-bath (each)	JMD \$38,000/mo	JMD \$47,000/mo	JMD \$58,000/mo
Gross/month (all 4)	JMD \$216,000	JMD \$264,000	JMD \$316,000
Annual gross	JMD \$2,592,000	JMD \$3,168,000	JMD \$3,792,000
At 90% occupancy	JMD \$2,332,800	JMD \$2,851,200	JMD \$3,412,800
USD equivalent	~\$15,050	~\$18,395	~\$22,018

C. STR Uplift — Upper Units (2× 1-bed, Ocean View)

Converting 2 upper-level 1-bed units to STR (Airbnb/VRBO, Ocho Rios market) could significantly increase income. Ocho Rios/St. Ann STR rates for a 1-bed unit: USD \$75–\$130/night.

Metric	Conservative	Base Case	Optimistic
Nightly rate (USD)	\$75	\$100	\$130
Occupancy	40%	50%	60%
Nights/year (per unit)	146	183	219
Revenue per unit	\$10,950	\$18,300	\$28,470
2 STR units combined	\$21,900	\$36,600	\$56,940
Less: platform fees (15%)	(\$3,285)	(\$5,490)	(\$8,541)
Net STR revenue	\$18,615	\$31,110	\$48,399

Mixed strategy (2× LTL 2-bed + 2× STR 1-bed) base case total income: USD \$11,661 (LTL 2-beds) + USD \$31,110 (STR 1-beds) = ~USD \$42,771 gross p.a.

D. Annual Operating Costs (LTL Only Scenario)

Property management (10% of gross LTL)	USD \$1,500 – \$1,840
Maintenance & repairs (2% — older build)	USD \$6,000 – \$8,000 (age unknown — conservative)
Property tax (Jamaica)	USD \$1,200 – \$1,800
Insurance (multi-unit residential)	USD \$2,500 – \$3,500
Utilities (common areas only)	USD \$600 – \$1,200
Accounting / compliance	USD \$800
TOTAL OPERATING COSTS	~USD \$12,600 – \$17,140

E. Net Operating Income (LTL — All 4 Units)

Scenario	Gross Revenue (USD)	Operating Costs	**NOI**
Conservative	\$15,050	\$17,140	(\$2,090)
Base Case	\$18,395	\$14,870	\$3,525
Optimistic	\$22,018	\$12,600	\$9,418

LTL-only conservative scenario is cashflow negative at USD exchange rates — driven by currency conversion. In JMD terms, the same property is comfortably cashflow positive. STR conversion of upper units is strongly recommended to maximise USD returns.

F. Price / Yield Sensitivity (Base Case NOI: USD \$3,525 LTL | USD \$18,000+ with STR mix)

Asking Price	Price/sq ft	LTL Gross Yield	STR Mix Gross Yield	Recommendation
USD \$200,000	\$47/sq ft	9.2%	21.4%	Strong buy
USD \$250,000	\$59/sq ft	7.4%	17.1%	Good value
USD \$300,000	\$71/sq ft	6.1%	14.3%	Acceptable
USD \$350,000	\$82/sq ft	5.3%	12.2%	Marginal
USD \$400,000	\$94/sq ft	4.6%	10.7%	Negotiate down
USD \$450,000	\$106/sq ft	4.1%	9.5%	Avoid without pool/dev upside

STR mix gross yield uses USD \$42,771 base-case blended income (2× LTL + 2× STR). Target purchase price: USD \$250,000–\$300,000 for a compelling risk-adjusted return.

6. RISK REGISTER

Risk	Likelihood	Impact	Mitigation
Asking price unknown	CRITICAL	CRITICAL	Request price from agent before any further analysis or site visit
Unknown year of build — hidden structural risk	HIGH	HIGH	Independent structural survey non-negotiable given unknown age
Apartment conversion without planning permission	MEDIUM	HIGH	Obtain St. Ann Parish Council building approval for conversion to 4 units
Unregistered or defective title	MEDIUM	CRITICAL	NLA title search and 30-year attorney search before any deposit
JMD currency risk (rents in JMD, costs in USD/GBP)	HIGH	MEDIUM	STR income in USD mitigates; consider USD-only rental agreements where possible
Maintenance cost uncertainty (old build)	MEDIUM	MEDIUM	Budget 2–2.5% of purchase price p.a. until post-survey condition confirmed
Vacancy risk — St. Ann's Bay secondary market	MEDIUM	MEDIUM	Mixed LTL/STR strategy reduces reliance on single income stream
Remote management quality	MEDIUM	MEDIUM	Appoint vetted local property manager; require monthly reporting
Helper's quarters / garage — unauthorised occupation	LOW-MEDIUM	MEDIUM	Confirm no informal occupants before purchase; clear legally if needed
Development upside — planning risk	LOW-MEDIUM	LOW	Any additional units require St. Ann Parish Council planning consent and NEPA review
Hurricane / weather damage	MEDIUM	HIGH	Multi-unit insurance essential; confirm flood zone and storm exposure

St. Ann's Bay resale liquidity	MEDIUM	MEDIUM	Hold 3–5 years minimum; not a liquid resale market
--------------------------------	--------	--------	--

7. COMPLIANCE AND DUE DILIGENCE FLAGS

CRITICAL — Resolve Before Any Deposit

- Obtain asking price from agent — not stated in listing
- Obtain Volume/Folio reference and confirm registered title with National Land Agency (NLA)
- Instruct Jamaican attorney to conduct full 30-year title search
- Confirm no encumbrances, caveats, mortgages, or disputes on title
- Obtain building permits and planning approval for conversion to 4 residential apartments from St. Ann Parish Council
- Confirm NEPA clearance and any environmental obligations

HIGH PRIORITY — Before Exchange

- Commission independent structural survey — year of build unknown; defects must be quantified
- Obtain surveyor's identification report confirming lot boundaries match title
- Confirm NLA / government land valuation for transfer tax calculation
- Confirm utility connections: JPS (electricity), NWC (water), internet — confirm all 4 units connected
- Confirm property tax compliance — no arrears
- Confirm helper's quarters and garage occupancy status — no informal tenants
- Obtain details of any existing tenancy agreements — confirm vacant possession or assignment of leases
- Confirm road is NWA-maintained or private — establish maintenance responsibility
- Confirm HOA / Seville subdivision covenants and annual fees

OPERATIONAL — Before Renting / STR Launch

- Register Taxpayer Registration Number (TRN) for Jamaican rental income
- TPDCo tourism accommodation licence required for any STR units
- Appoint and contract local property management company
- Obtain multi-unit insurance: property, hurricane, contents, liability
- Furnish units to target market standard (STR units to higher specification)
- STR units: onboard to Airbnb, VRBO, and specialist Jamaica platforms

PROFESSIONAL ADVICE REQUIRED

- Jamaican attorney — title search, transfer, and legal completion
- UK / Jamaica accountant — rental income tax, JMD/GBP reporting, double tax treaty
- Local chartered surveyor — structural survey, ID report, valuation
- Insurance broker (Jamaica-specialist) — multi-unit, hurricane, STR liability
- Planning consultant — if adding units or changing use to senior/assisted living

8. OFFER PRICE GUIDANCE

Scenario	Offer Guidance	Rationale
Title clear, survey clean, full planning compliance, price ≤ USD \$280,000	USD \$260,000 – \$275,000	Excellent yield, development upside, strong buy
Title clear, survey clean, price USD \$280,000 – \$350,000	Negotiate to USD \$275,000 – \$310,000	Use unknown age and missing compliance as leverage
Any title defect or planning non-compliance on conversion	DO NOT OFFER	Resolve title / planning first — material deal-breaker
Listing price > USD \$400,000	Pass unless STR mix income confirmed with evidence	Yields become marginal above \$400k without STR uplift

Target Offer Range: **USD \$260,000 – \$295,000** — subject to confirmed asking price, clean title, structural survey passed, and planning compliance confirmed. 48 DOM gives leverage to negotiate.

9. BEST EXIT STRATEGY

Multi-Family BTL + Partial STR Conversion — Medium-Term Hold (3–7 Years)

Retain 2× 2-bed/2-bath units as long-term residential lets targeting St. Ann's Bay professionals and workers at JMD \$85,000/month each. Convert 2× 1-bed upper-level units (ocean views) to short-term rental (Airbnb/VRBO), targeting the Ocho Rios tourist market at USD \$100/night, 50% occupancy. Mixed-strategy base-case gross income: ~USD \$42,771 p.a. Appoint a local management company at 18–20% of gross revenue.

Hold for 3–7 years. During hold period, explore planning consent for additional unit(s) on remaining lot area (~8,640 sq ft undeveloped). Exit via sale to owner-occupier seeking income-generating property, or to a local investor. At a modest 3% p.a. capital appreciation, a USD \$275,000 purchase reaches ~\$319,000 at Year 5.

10. BACKUP EXIT STRATEGY

Operator Lease / Full Management Lease

Lease the entire building to a Jamaica housing or serviced accommodation operator on a guaranteed rent or net revenue share. Reduces management complexity for a remote owner. Typical operator take: 30–40% of gross income for full management.

Secondary: Senior / Assisted Living Facility

The 'seniors oriented' listing tag and the quiet, established subdivision environment suggest potential as a boutique senior accommodation facility. The 4-unit layout, multiple bathrooms, garden space, and north coast location align with Jamaica's growing senior care market. Requires Ministry of Health licensing, planning change of use, and specialist operator — a longer lead time strategy but potentially higher value exit.

11. RED / AMBER / GREEN VERDICT

VERDICT: AMBER

Proceed to Due Diligence — Negotiate on Price

Strong multi-family income asset | Development and STR upside | Price confirmation and title verification required

Factor	Status	Notes
--------	--------	-------

Asking Price	MISSING	Not provided in listing — request before any action
Location / Connectivity	STRONG	North coast highway, 20 min to Ocho Rios, sea views
Income Asset (4 units)	STRONG	Already configured for multiple income streams
Floor Size / Lot	GOOD	4,245 sq ft building + 0.30 acre lot with development potential
STR Potential	MEDIUM	Upper-level ocean view units viable for Ocho Rios STR market
USD Yield (LTL only)	MARGINAL	JMD rents weak in USD — STR mix essential for acceptable USD return
Year of Build	UNKNOWN	Not stated — structural survey essential before exchange
Title	UNVERIFIED	NLA title search required; conversion planning compliance unknown
Planning Compliance	UNVERIFIED	Apartment conversion permits to be confirmed
Utilities	LIKELY OK	Established subdivision — confirm all 4 units connected
DOM 48	POSITIVE	48 days on market provides negotiating leverage

Issue GREEN once: asking price confirmed and acceptable, title clean, structural survey passed, apartment conversion planning compliance confirmed. Issue RED if: title defective without clear resolution path, survey reveals major structural defects, or asking price exceeds USD \$400,000 without strong STR income evidence.

12. NEXT ACTION CHECKLIST

Immediate — Today

- Contact agent (MLS# 100907) to obtain asking price — this is the single most urgent action
- Request year of build and any available property condition report
- Request copies of: title/Volume/Folio, building permits for apartment conversion, any planning approvals
- Request existing tenancy agreements and current occupancy status of all 4 units
- Request details of Seville subdivision covenants, HOA, and maintenance fees

Within 1 Week

- Instruct Jamaican attorney to commence NLA title search
- Commission structural survey — year of build unknown, this is non-negotiable
- Obtain surveyor's identification report confirming lot boundaries vs title
- Obtain 2–3 STR market comparable rates for 1-bed ocean view units near St. Ann's Bay / Ocho Rios corridor
- Obtain 2–3 LTL comparable rents for 2-bed and 1-bed units in St. Ann's Bay / Seville
- Identify and shortlist 2 local property management companies

Before Exchange

- Confirm NLA / government land valuation for transfer tax
- Confirm all 4 units have live JPS and NWC connections
- Confirm St. Ann Parish Council planning approval for 4-unit residential use
- Confirm property tax compliance — no arrears
- Confirm helper's quarters and garage status — no informal occupants
- Brief UK accountant on Jamaica multi-unit rental income and HMRC reporting
- Confirm TRN registration and TPDCo licensing process for any STR units

-
- Obtain multi-unit insurance quote: property, hurricane, liability
 - Assess lot development potential — obtain planning pre-application advice from St. Ann Parish Council
-

This report is produced for investment evaluation purposes only and does not constitute legal, tax, mortgage, planning, or professional surveying advice. All financial projections are estimates based on assumed and available data and must be independently verified. Instruct a qualified Jamaican attorney, chartered surveyor, and accountant before proceeding with any transaction.
